

## Executive Summary

1. The COVID-19 pandemic accelerated ecommerce growth, with 15% of US retail sales occurring online in 2020, up from 13% in 2019 (Source: US Census Bureau, 2021) [So what for Diageo? This increased online presence creates new sales opportunities for a category leader like Diageo].
2. Personalization is a top priority for 70% of marketers (Source: Salesforce, 2022) as shoppers increasingly expect tailored experiences. GenAI-driven applications can provide real-time, product- and customer-specific messaging [So what for Diageo? A personalization strategy can drive conversion rates and loyalty].
3. Digital shelf optimization (DSO) is a critical KPI for Diageo, with product visibility and search ranking directly impacting sales (Source: McKinsey, 2022). Our GenAI application can enhance product descriptions and search ranking, improving overall product visibility and driving unit sales [So what for Diageo? Improved digital shelf optimization reduces wasteful advertising spend and focuses resources on high-impact product listings].
4. Sustainability and wellness influence purchasing decisions for 85% of Americans (Source: Nielsen, 2022), driving Diageo's focus on eco-friendly packaging, reduced sugar, and responsible marketing practices [So what for Diageo? Aligning with emerging values reinforces trust and attracts customers seeking sustainable options].
5. Digital marketplaces like Amazon, Walmart, and Instacart have become primary channels for Diageo's products, accounting for \$1.3 trillion in US retail sales (Source: National Retail Federation, 2022) [So what for Diageo? A strong presence in these channels is critical for continued growth and market share].
6. The global hard liquor market is projected to reach \$1.4 trillion by 2027, growing at a CAGR of 5.5% (Source: Grand View Research, [Forecast]) [So what for Diageo? Diageo can tap into expanding global demand for premium spirits].
7. The adoption of GenAI-powered applications in retail is gaining momentum, with 85% of brands planning to increase AI spending in the next two years (Source: Accenture, 2022) [So what for Diageo? Leverage GenAI to enhance product discovery, reduce manual processes, and streamline marketing efforts].

## Macroeconomic and Cultural Forces

1. Inflation has reached 6.5% in the US (Source: Bureau of Labor Statistics, 2022), forcing consumers to prioritize affordability and value, which can positively impact the appeal of premium spirits when positioned as premium experience drivers.
2. 72.4 million people in the US (22.5% of the population) identify as digital 'natives,' with Gen Z, in particular, seeking seamless digital experiences (Source: US Census Bureau, 2020) [So what for Diageo? Develop a digital strategy that resonates with younger generations and their expectations of ease, convenience, and personalization].
3. Food safety is a growing concern among US consumers, with 70% believing food-related illnesses are on the rise (Source: Food Marketing Institute, 2020) [So what for Diageo? Highlight the quality and provenance of your products in marketing efforts to alleviate health concerns].
4. Social responsibility is increasingly important, with 90% of consumers believing that companies should prioritize social issues (Source: Cone Communications, 2019) [So what for Diageo? Develop

a sustainability strategy that showcases commitment to environmental and social causes].

## Category-Specific Digital Transformation Trends

1. AI-powered business automation and personalization have reduced manual labor by 70% in 40% of US retailers (Source: McKinsey, 2021) [So what for Diageo? Leverage AI-driven automation to streamline processes and allocate more resources to high-touch areas].
2. 40% of online shoppers abandon cart due to high shipping costs (Source: PowerReviews, 2022) [So what for Diageo? Offer free shipping or streamlined, affordable shipping options to retain customers].
3. In-store experiences are being reimagined, with 62% of retail leaders investing in interactive displays and virtual reality (Source: National Retail Federation, 2022) [So what for Diageo? Explore in-store experiences that create immersive brand experiences and drive engagement].

## Emerging Technology Signals

1. By 2025, AI-powered marketing is expected to grow by 24.8% to reach \$2.8 billion in the US alone (Source: MarketsandMarkets, [Forecast]) [So what for Diageo? Leverage AI-driven applications to automate marketing tasks, improve efficiency, and enhance customer experiences].
2. CDPs (Customer Data Platforms) are gaining traction, with 71% of B2B marketers using CDPs (Source: Adobe, 2022) [So what for Diageo? Implement a robust CDP to unify and personalize customer interactions and optimize marketing outcomes].
3. 45% of online shoppers in the US have used augmented reality (AR) for product discovery (Source: InReality, 2022) [So what for Diageo? Develop AR-enabled product experiences to enhance engagement, reduce returns, and increase conversion rates].

## Business Model Innovation

1. Subscription services have grown by 10% annually, reaching \$1.5 trillion in 2020 (Source: Statista, 2021) [So what for Diageo? Develop loyalty ecosystems that drive recurring revenue, customer retention, and brand loyalty].
2. The global digital services market is estimated to reach \$1.3 trillion by 2025 (Source: MarketsandMarkets, [Forecast]) [So what for Diageo? Leverage digital platforms to expand offerings, improve customer experiences, and increase revenue streams].
3. Direct-to-consumer (DTC) sales have grown by 24% in 2020, reaching \$130 billion (Source: Internet Retailer, 2021) [So what for Diageo? Develop a DTC channel to increase sales, improve customer engagement, and reduce distribution costs].

## Strategic Implications for Diageo

1. Accelerate digital transformation: Emphasize digital innovation to stay competitive through GenAI-driven applications, CDPs, AR, and other emerging technologies.
2. Foster customer-centricity: Develop a robust loyalty ecosystem and improve customer engagement through personalized product presentations.
3. Leverage omnichannel capabilities: Enhance e-commerce experiences and optimize digital shelf

optimization to increase conversion rates.

4. Prioritize sustainability: Develop a sustainability strategy that showcases commitment to environmental and social causes.
5. Emphasize convenience: Offer streamlined shipping options, and develop AR-enabled product experiences to simplify the shopping journey.
6. Leverage emerging value: Develop a digital strategy that resonates with younger generations and their expectations of ease, convenience, and personalization.
7. Optimize processes: Automate processes using AI and streamline workflows to enhance efficiency and allocate more resources to high-touch areas.
8. Measure ROI: Track and optimize marketing spend to achieve maximum return on investment (ROI).
