

The Bounteous AI Pursuit Process

A Step-by-Step Guide

Before you get started...

1. Download and save this document to your pursuit folder on the BD Sharepoint. This document will become the place to put the outputs from ChatGPT and will be the document you work in to ultimately create the narrative of your story.
2. After you read the process guide, you can delete those pages to make navigating the document easier. You can also expand the navigation pane (at the top left of the page -> ) to make moving from one section to another easy.
3. As you run prompts through ChatGPT and receive responses, you can paste the outputs into or over the respective section in this document. As you work through the process the document will move from being your guide to being your output reference and presentation draft.
4. Ensure you closely review, document and organize all references and sources of information from each output.
5. Each prompt is meant to be refined and tailored before actually running it for a serviceable output. You will find [bracketed] placeholders in each prompt for you. Feel free to ask ChatGPT to tailor the prompt based on previous steps and outputs before running the prompt but be mindful of ChatGPT misunderstanding to run the prompt instead.

Pursuit Process Guide

Augmenting our Pursuits with AI to deliver faster, higher quality pitches that win deals

Process Overview

This process is a repeatable, human-guided way to turn raw inputs (briefs, calls, research, and examples) into a persuasive, evidence-based proposal. It moves from understanding (opportunity, market, behavior, competition) to focus (opportunity zones), to an executable operating model (a strategic framework with recommendations that move Key Performance Indicators), and finally to a story buyers can approve (slides organized with the Perspective, Pain, Gain, Uniqueness, Proof structure). It is designed to be fast, source-anchored, and adaptable to any industry or technology stack.

How it Works

1. **Aim.** Align internally on the opportunity, decision makers, buying dynamics, and the win plan through the Internal Opportunity Brief and the Competitive Battle Card.
2. **Understand.** Establish “why now” and “what wins” by analyzing market forces, consumer behavior, and the competitive bar.
3. **Frame.** Synthesize research into a small set of high-leverage Opportunity Zones where behavior, value, and platform capability converge. Convert Opportunity Zones into a branded, buildable strategic framework and attach concrete recommendations that move Key Performance Indicators.
4. **Synthesize.** Assemble the strongest content into a long-form point-of-view narrative proposal or convert that narrative into presentation-ready slides.
5. **Package.** Sequence the slides and case studies into the P-PGUP structure (Perspective, Pain, Gain, Uniqueness, Proof) to deliver a deal-winning story with a clear next step. Translate strategy into visuals through a Creative Brief, and tailor case studies into the client’s language without changing the facts.

Best practices

1. **Avoid the “about us” trap—start with them.** Begin the deck with the client’s world: their market signals, consumer behaviors, and competitive realities. Do not open with who we are or a credential slide. A human editor must confirm that the first section answers “what the client is missing” before any “about us” content appears later.
2. **Ensure you understand and can communicate the pitch narrative.** Before you move from research to building slides, explain the story out loud: why now, what must change, and what we will do that moves the needle for their business.
3. **Use AI as a tool, but the Pursuit Lead owns the story.** Let AI surface options and drafts, then the Pursuit Lead decides what stays to drive a clear narrative that ends with why Bounteous is the best fit. Keep only content that advances the argument, remove duplicates and weaker versions, and log a one-line rationale for each keep/drop so decisions are transparent.
4. **Tie every insight to an action, and run a feasibility check.** Each finding should lead to an implication and then to a recommendation that moves a Key Performance Indicator. A Solution Lead or another qualified reviewer must confirm the recommendation is feasible on the client’s data, platforms, and governance model.
5. **Cite, verify, and assign ownership to every signal.** Include the publisher and publication date for any statistic or market shift, and require a human reviewer to click through and confirm the source exists, the number matches, and the date is correct. Fact-check all numbers, quotes, logos, and platform references.
6. **Run a final “buyer read.”** Ask someone who was not involved in drafting to read the deck as if they were the buyer and answer in writing: “Do I feel understood?”, “Do I see a better way?”, and “Do I trust this team to deliver?”. Address any “objections” before delivery.

Process Steps and RACI

RACI means Responsible (does the work), Accountable (owns the outcome), Consulted (gives input), and Informed (kept in the loop). Adjust titles to fit your team as needed.

Step	Purpose	Primary outputs	R (Responsible)	A (Accountable)	C (Consulted)	I (Informed)
1.1 – Internal Opportunity Brief	Align team on opportunity, win strategy, and path beyond the deck	Opportunity Brief: stakeholder map, win strategy, pitch narratives / themes, off-deck plays, risks	Pursuit Lead	Pursuit Lead	Solution Lead; Strategy Lead	Executive Sponsor; Sales Operations
1.2 – Competitive Battle Card	Convert opportunity into competitor-specific positioning and counterplays	Battle Card: Competitor positioning, differentiation matrix, narrative guide, counterplay library	Pursuit Lead	Pursuit Lead	Solution Lead	Executive Sponsor

Step	Purpose	Primary outputs	R (Responsible)	A (Accountable)	C (Consulted)	I (Informed)
2.1 – Market Research: Market Context	Establish “why now” with dated, source-cited market forces	Market Research Report	Pursuit Lead	Pursuit Lead	Strategy Lead	Executive Sponsor
2.2 – Consumer Behavior & Psychology	Decode rituals/frictions; translate to levers and KPIs	Consumer Research and Insights	Pursuit Lead	Pursuit Lead	Experience Lead; CRM & Loyalty Lead; Solution Lead	Executive Sponsor
2.3 – Competitive Landscape	Show rising bar, gaps, and how to win	Competitive Analysis: Digital maturity landscape, 3–5 competitive audits, cross-brand patterns, implications	Pursuit Lead	Pursuit Lead	Solution Lead; Strategy Lead; Experience Lead	Executive Sponsor
3.1 – Strategic Opportunity Zones	Synthesize research into 4–5 high-leverage zones and prioritize	Opportunity Zones	Pursuit Lead	Pursuit Lead	Strategy Lead;	Executive Sponsor

Step	Purpose	Primary outputs	R (Responsible)	A (Accountable)	C (Consulted)	I (Informed)
					Solution Lead	
3.2 – Strategic Recommendations	Turn chosen zones into an operating model with KPI-moving recs	Strategic Framework and Recommendations	Pursuit Lead	Pursuit Lead	Applicable Practice/Competency Leads; Solution Lead	Executive Sponsor
4.1 – POV Synthesis: Long-Form Narrative	Assemble best sections into an Insights→Implications→Recs narrative	Long-form POV narrative for emailed proposal	Pursuit Lead	Pursuit Lead	Strategy Lead; Solution Lead	Executive Sponsor
4.2 – Narrative→Slides Conversion	Reformat narrative into content-rich, exec-ready slides	Pitch copy in slide deck format	Pursuit Lead	Pursuit Lead	Strategy Lead; Design Lead (later	Executive Sponsor

Step	Purpose	Primary outputs	R (Responsible)	A (Accountable)	C (Consulted)	I (Informed)
					visual treatment)	
4.3 – Case Study Tailoring	Rewrite cases in prospect's language/KPIs without changing facts	Case Studies tailored to client / industry	Pursuit Lead	Pursuit Lead	Solution Lead; Legal/Compliance (if needed)	Executive Sponsor
4.4 – Creative Brief & Visual Exploration	Define visual direction for 2–3 specific creative comps	Creative Brief	Pursuit Lead	Pursuit Lead	Design Lead; Experience Lead; Strategy Lead	Executive Sponsor

Step	Purpose	Primary outputs	R (Responsible)	A (Accountable)	C (Consulted)	I (Informed)
5.1 – P-PGUP Assembly (Manual)	Reorder into Perspective→Pain→Gain→Uniqueness→Proof story	Proposal in P-PGUP structure	Pursuit Lead	Pursuit Lead	Strategy Lead; Solution Lead; Applicable Practice Lead; Design Lead	Executive Sponsor

Step 1.1: Internal Opportunity Brief

Purpose

Align the internal team on the nature of the opportunity, our strategic edge and win strategy, and how we will move beyond the deck to win influence and conviction. This step is the foundation for all future work. The Opportunity Brief becomes the single input that steers every downstream prompt, research task, POV slide, and scope decision so everything aligns to the client context and the win plan.

The Opportunity Brief is:

- An internal document that captures the client situation, buying dynamics, pains, desired outcomes, and our chosen angle of attack.
- A concise map of who matters, what they care about, and how we plan to win.
- A decision record that locks our primary narrative, top win themes, early off deck moves, and known risks or assumptions.
- The living source of truth that informs and constrains every later prompt so outputs stay consistent and persuasive.

Owners and RACI

- **Pursuit Lead (Responsible/Accountable)** gathers inputs, drives synthesis, publishes the brief.
- **Solution Lead (Consulted)** pressure test feasibility and value claims.
- **Sales Ops or Coordinator (Informed)** manages files and calendars.
- **Executive Sponsor (Informed or Consulted)** validates win themes when needed.

Tools

- **ChatGPT** to translate raw inputs into narrative, differentiators, and positioning.
- **Client Meeting Transcript** to pull verbatim pain points, tone, and stakeholder dynamics from transcripts.
- **Prompt Template** for Opportunity Brief and stakeholder table.

Step Process

1. **Ingest the essentials**

Gather the minimum viable inputs: stakeholder list, RFP or ask, call notes or transcripts, known competitors, existing relationships, and any proof points. Work with excerpts, not full documents.

2. **Synthesize a first pass**

Use the provided prompts to generate a tight Opportunity Brief. Require specific sections: Client Snapshot, Pain Points and Opportunity Areas, Our Angle of Attack, Competitors and Positioning, Strategic Allies, Value Proposition, and Off deck Sales Plays. Label assumptions clearly.

3. **Build the stakeholder map**

Create a table of personas with goals, anxieties, decision power, proof they trust, message that lands, and the single next move for each.

4. **Set the win strategy**

Select the primary narrative and top three win themes that map directly to buyer pains and evaluation criteria. Identify landmines and counters. Confirm feasibility with the solution lead.

5. **Codify off deck moves**

List two to three fast actions outside the formal pitch. Assign owners and dates so momentum starts now.

6. **Publish and lock**

Share the one pager and stakeholder map with the team. Save using the naming convention. The brief is now the reference for all future prompts and drafts. Update when new facts or sponsors emerge.

Why this matters

- It reduces rework by aligning early on the buyer, the story, and the proof that will earn trust.
- It raises quality by forcing explicit choices and marking assumptions.
- It accelerates delivery because every prompt and artifact now has a clear target and guardrails.

Inputs checklist

Collect any of these inputs you have readily available before you open ChatGPT. Paste excerpts only, note dates.

1. **Stakeholders and dynamics:** names, roles, decision power, influencers, internal blockers, informal power lines.
2. **Client brief or RFP:** themes, evaluation criteria, formal requirements, stated initiatives or goals.
3. **Meeting transcripts and notes:** verbatims, goals, tone, discovery notes.
4. **Sales strategy and positioning:** what we plan to propose and how we will differentiate.
5. **Known competitors and threats:** who else is involved, what they will pitch, gaps to exploit, strengths to counter.
6. **Strategic relationships and allies:** champions, past collaborators, executive sponsors, adjacent orgs.
7. **Off-deck plays and tactics:** demos, clickable prototypes, intros, partner support.
8. Step 1.1 Prompt

Prompt

You are a pursuit sales strategist creating an internal Opportunity Brief for [Brand Name], a [prospective/existing] client that is [short description of ask]. Using ONLY the inputs I provide, produce a clear, structured brief that aligns the team on the client's needs, our strategic position, and how we plan to win.

Global constraints:

- Format with the exact section headers below (## Header).
- Use plain-English, concise sentences. No em dashes.
- Mirror the client's language where possible; include 1-2 verbatim quotes in Pain Points.
- Tie every claim to the inputs; if you must infer, label it [Assumption].
- Prioritize specificity over breadth. Avoid generic claims.
- End with "Gaps & Validation" (3-5 items we must confirm).

Client Snapshot

- Industry, company size, business model

- Brand posture (e.g., disruptor, legacy, innovation-led, value brand)
- 2-4 strategic initiatives or transformation goals
- Named stakeholders & roles (Decision Power: H/M/L)

Pain Points & Opportunity Areas

- 3-6 core challenges (include 1-2 verbatim quotes)
- Strategic whitespace / unmet needs
- External pressures (category trends, consumer behavior, regulation)

Our Angle of Attack

- The lead narrative (e.g., “own the daily ritual,” “unlock predictive CX”)
- What we’re proposing and how it maps to their goals
- Why this is differentiated and timely (capability, proof, timing)

Known Competitors & Positioning Strategy

- Who else is likely to pitch and their likely lead story
- Our counters and differentiation (2-4 bullets)

Strategic Allies & Relationships

- Internal champions / past engagements / executive ties
- Third-party leverage or partners we can activate

Value Proposition for the Client

- Expected business impact framed in client KPIs (e.g., revenue, margin, NPS, CAC/LTV, speed-to-value)

- 2-4 measurable statements (directional is fine; mark [Assumption] if inferred)

Stakeholder Map (Table)

Return as a markdown table with columns:

Persona/Name | Role | Goals | Anxiety/Objections | Decision Power (H/M/L) | Preferred Proof | Message That Lands | Next Move (Owner, Date)

Win Themes & Landmines

- Win Themes: 3-5 concise themes mapped to buyer pains **and stated evaluation criteria** (1 line each)
- Landmines: 5-8 likely traps (e.g., procurement, politics, "we already tried X") with a 1-line counter for each

Off-Deck Sales Plays (Fast Actions)

List 3-6 tactical moves outside the formal pitch. For each, specify:

Objective • Artifact (demo/prototype/email) • Proposed Owner (role) • Prep time • Risk

Risk Register (Top Risks)

List 5-8 risks with: Risk • Likelihood (H/M/L) • Impact (H/M/L) • Early Warning • Mitigation • Owner

Messaging Options (Client Language)

Provide 3 short options (2-3 sentences each) for how we would frame our story in the client's voice, plus a one-sentence CTA for each.

Next Step & Owner

One sentence with the immediate next action, owner (role), and date.

Gaps & Validation

List 3-5 items we must confirm (facts, access, decisions) to de-risk this plan.

INPUTS:

[paste stakeholder list, RFP excerpts, meeting notes, what we're selling, known competitors, off-deck ideas, case studies, etc.]

Step 1.1: Competitive Battle Card

Goal

Create an internal, competitor-by-competitor positioning tool that translates the Opportunity Brief into clear guidance on each rival's strengths and predictable weak spots, how their offers, proof points, and pricing typically show up, which client needs naturally align to our strengths, and the narrative moves that lead evaluators from needs to criteria to our differentiation.

A Battle Card is:

- A **set of concise competitor dossiers** and a **differentiation matrix** that sales, solutions, and execs can digest at a glance.
- A **positioning compass**: map from client pains/evaluation criteria → our win themes → counters to rival angles.
- A **repeatable reference** updated as we learn (win-loss, transcript snippets, procurement feedback).

How it is used (internally)

- **Pre-narrative**: Choose win themes that align with stated/latent client criteria and point away from rival advantages.
- **Deck drafting**: Inform POV spine, proof selection, and which features/capabilities to emphasize or de-emphasize.
- **Coaching**: Equip reps and solution leads with specific counters and “lead the witness” discovery prompts.
- **Deal review**: Sanity-check whether our storyline is actually pointed at decision criteria we can win.

Owners and RACI

- **Pursuit Lead (Responsible / Accountable)** builds/maintains cards and matrix.
- **Solution Lead (Consulted)** validate realities and counters.
- **Executive Sponsor (Informed)** aligns on risk posture and claims.

Tools

- **ChatGPT** to synthesize crisp profiles and matrices.

Inputs

- Step 1 Opportunity Brief
- Named competitors (and any known angles/alliances/platforms)
- Any evaluation criteria/weights (if provided by the client) or inferred
- Step 1.1 Prompt

Outputs

- **Competitive Field Overview (table)**
- **Head-to-Head Battle Cards** (one per competitor; internal use only)
- **Differentiation Matrix** (client needs × evaluation criteria × who leads)
- **Narrative Guide** (how to steer from needs → criteria → our strengths)
- **Counterplay Library** (counters to common rival claims)

Step Process

1) Collect — 5 minutes

Grab the Opportunity Brief, named competitor list, any evaluation criteria, and a few verbatims from calls/win-loss. Excerpts only.

2) Synthesize first pass — 15 minutes

Run the single prompt (below). Produce: field overview table, one complete card for the top rival, a draft differentiation matrix, and a narrative guide.

3) Validate — 7 minutes

Quick sync with Sales + Solution: confirm rival strengths/weaknesses and counters; mark gaps as [Assumption] or [Market Pattern].

4) Finalize — 3 minutes

Lock the cards and matrix; note “Gaps & Validation” for follow-up.

Prompt

You are a senior competitive strategist building INTERNAL battle cards for Bounteous based on the Opportunity Brief.

INPUTS

1) OPPORTUNITY BRIEF

[Paste the full Opportunity Brief]

2) COMPETITORS

[List each competitor, e.g., Accenture, Merkle, WillowTree]

OPTIONAL CONTEXT

[Client evaluation criteria/weights, stakeholders and their priorities]

TASK

Using ONLY the inputs above, create a pragmatic, internal COMPETITIVE POSITIONING PACK. Do not invent facts. If information is missing, label as [Assumption]. If using general market tendencies, label as [Market Pattern]. Use plain English.

OUTPUTS

1) Competitive Field Overview (table)

Columns: Competitor | What they reliably win with (in this context) | Where they reliably stumble | Typical offer/config (scope, team shape, platform bias) | Pricing/terms posture | Procurement perception

2) Head-to-Head Battle Cards (one section PER competitor; concise bullets)

- Core strengths for THIS scope (≥5)
- Recurring weaknesses in THIS scope (≥5)
- Likely narrative/angles they will run
- Discovery prompts that expose gaps (≥3)
- Counters to their common claims (specific lines; cite proof assets)

- Proof moments we should emphasize against them (cases, metrics, patterns)

- Watch-outs (commercial, delivery, compliance)

3) Differentiation Matrix (table)

Rows: Client needs / evaluation criteria from the Brief

Columns: Criterion | Weight (if known) | Our edge | Competitor A edge
| Competitor B edge | Notes

Mark [Assumption] where weights/edges are inferred.

4) Narrative Guide (internal positioning)

- Three win themes that steer evaluators toward criteria we lead on (tie to client KPIs)

- How to reframe rival strengths into risk or cost (one line each)

- Which capabilities/proofs we should foreground vs. background (and why)

5) Counterplay Library (cheat-sheet)

- Rival claim → Short counter line → Evidence/case to cite → Optional risk to flag

6) Gaps & Validation (3-5 items)

- Facts to confirm with Sales/Solution/Procurement before finalizing.

RULES

- Tie every statement to the Opportunity Brief, [Assumption], or [Market Pattern].

- Prefer tables for comparisons; bullets for clarity.

- Keep the full pack concise and skimmable.

FINAL CHECK

End with a 5-line internal TL;DR: Where we win • Where each rival leads • The narrative we'll run • Proof to foreground • Biggest open risk.

Step 2.1 — Market Research

Goal

Create a research-grade market context briefing that explains the macro forces reshaping the client's category. Cover economic, cultural, demographic, and technological shifts and how they are changing consumer expectations, business models, and innovation priorities. The output establishes urgency (why now), builds credibility, frames opportunity, and grounds the pursuit's POV and proposal in real-world momentum.

Owners and RACI

- **Pursuit Lead (Responsible / Accountable)** generates research using prompts and their own discretion to determine what is important for this prospect.
- **Strategy Lead (Consulted)** validate implications and feasibility.
- **Executive Sponsor (Informed)** aligns on tone and risk posture.

Tools

- **Primary:** ChatGPT for drafting and synthesis
- **Support (optional):** Gemini or Claude for cross-check and triangulation (if available)

Inputs

- **Opportunity Brief** (from Step 1)
- Step 2.1 Prompt

Outputs

- **Market Context Report** using the section outline below
- **Citations** (table of all figures with source and date)
- **Implications Summary** (5–8 bullets that feed win themes)

Step process

1) Collect — 5 min

Grab the Opportunity Brief, and any additional client-provided research (if any).

2) Customize and generate — 15 min

Ask ChatGPT to revise and run the template prompt (below) using the Opportunity Brief. Use a Pro model for better output.

3) Tighten and tag — 7 min

Skim for relevance. Expand thin areas or compress verbose ones with additional prompting. Ensure the research builds a case toward the sales narrative and win strategy.

4) Package — 3 min

Finalize and format the report. Add a brief executive summary at the top and append the bibliography.

Prompt

You are a senior strategist preparing a deep-dive Market Context report for a digital transformation proposal to [Brand Name], a [business maturity] organization in [Industry/Category] operating in [Geographic Focus]. Using ONLY reputable, recent sources, write a comprehensive, source-cited briefing that synthesizes the macroeconomic, cultural, demographic, and technological forces reshaping the client's category. This is an INTERNAL document that informs downstream strategy, experience design, creative concepting, and solution planning. It must establish urgency ("why now"), frame opportunity, and ground recommendations in real-world momentum.

Global rules

- Use structured, executive-ready prose. Plain English. No em dashes.
- Cite every stat or external claim with source name and date (≤18 months when possible). If older or forecasted, label [Forecast] and include horizon year or rationale.
- If you infer beyond sources, label [Assumption] and keep it minimal.
- Avoid generic trend statements. Every claim must be tied to a source or a clearly labeled inference.

- After each section, add a one-sentence "So what for [Brand Name]" tied to likely evaluation criteria or KPIs.
- End with a 5-8 bullet "Implications Summary" mapped to evaluation criteria or KPIs.

Required sections

Executive Summary (6-8 bullets)

- Why this is a pivotal moment (macro forces converging)
- What is changing in customer behavior and platform capabilities
- The size of the opportunity or scale of disruption (quantified)
- Why now for [Brand Name] (1-2 bullets)
- Three strategic implications that can seed win themes

Macroeconomic and Cultural Forces

- Inflation or price sensitivity, labor dynamics, automation, sustainability, trust, convenience, wellness or identity
- How work, shopping, eating, movement, communication, or care are shifting
- Include 6-10 recent stats with dates and 1-2 short quotes from credible sources
- So what for [Brand Name] - explain why this is relevant to them and what the implications are

Category-Specific Digital Transformation Trends

- How digital is reshaping value creation, delivery, and capture: AI and business automation, personalization, mobile and app UX, ecommerce or self-service, loyalty, omnichannel, portals, CRM or CDP modernization, near-store or in-store digitization
- Four to six concrete examples from leaders or disruptors with source and date
- So what for [Brand Name]

Emerging Technology Signals

- Examples (not limited to these, expand into any relevant signals beyond these examples): AI or ML, CDP or real-time orchestration,

composable or headless, APIs, voice or AR or VR, IoT, biometrics or behavioral triggers

- Where adoption is measurable and the new use cases or efficiencies unlocked

- So what for [Brand Name]

Business Model Innovation

- Examples (not limited to these, expand into any relevant business model innovations beyond these examples): subscriptions or memberships, loyalty ecosystems, vertical integration, creator or partner co-creation, service layers, embedded finance, platform partnerships

- Two to three adjacent category examples to spark imagination with citations

- So what for [Brand Name]

Strategic Implications for [Brand Name]

- Why this moment requires transformation, not optimization

- Risks of slow action vs upside of leadership

- Five to eight implications mapped to [Brand Name] evaluation criteria and KPIs

- Why Bounteous is suited given experience, commerce, personalization, loyalty, platforms, and performance. Keep factual and concise.

Bibliography

Full list of sources with titles, publishers, dates, and links.

Notes

- If a claim is based on a forecast, label [Forecast] and include horizon year.

- If data is not available for [Geographic Focus], use the nearest proxy and label [Assumption].

Quality bar

- **Recency:** Most citations $\leq$ 18 months. Older or forecast items labeled.
- **Specificity:** No generic trends. Every claim is sourced and aligned with relevancy to the client and our recommended strategies.
- **Coverage:** Macro, Segments, Digital trends, Tech signals, Business models, Implications.
- **Traceability:** Stats Annex and Bibliography complete with dates and links.
- **Actionability:** 5–8 implications map to evaluation criteria or KPIs and seed win themes.

Step 2.2 — Consumer Behavior & Psychology

Goal

Develop a research-grade, segment-specific briefing that decodes how people think, feel, act, and interact across the journey in [Brand Name]’s category—so we can use this research to develop strategic recommendations using real consumer behaviors (not clichés). This step connects macro forces (Step 2.1) to live customer behavior, surfacing rituals, emotional drivers, digital expectations, and friction points that we can convert into clear strategic levers.

Owners and RACI

- **Pursuit Lead (Responsible / Accountable)** generates consumer research using prompts and their own discretion to determine what is important for this prospect, and why it matters.
- **Strategy Lead / Experience Lead (Consulted)** validate journey implications and design readiness.
- **Executive Sponsor (Informed)** aligns on tone, risk posture, and where to place strategic bets.

Tools

- **Primary:** ChatGPT
- **Support (optional):** Claude (if available)

Inputs

- **Opportunity Brief** (Step 1)
- **Market Context Briefing** (Step 2.1)
- **Target consumer segments** (if provided by clients)
- Step 2.2 Prompt

Outputs

- **Segmented Behavioral Report** (structure below)
- **Theme-to-Strategy Map** (table: behavioral theme → strategy lever → example move → KPI)

Step process

1) Frame & collect — 5 min

Revise the Prompt (below) to reflect the Opportunity Brief.

2) Generate first pass — 15 min

Run the revised Prompt, asking for: Executive Summary, Segment Deep Dives (2–3 segments), Emerging Cross-Segment Themes, Strategic Implications, and the Theme-to-Strategy Map.

3) Tighten & aim at strategy — 7 min

Compress generic sections; expand any areas that need more depth. Ensure every behavioral claim points to a lever (platforms, digital experiences, personalization, UX, content, offers, service).

4) Package — 3 min

Add a 1-page Executive Summary, paste tables at the end, and include all cited references.

Prompt

You are a senior strategist preparing a segmented Consumer Behavior & Psychology analysis for a digital transformation/experience innovation proposal to [Brand Name], a [business maturity] organization in [Industry/Category] within [Geographic Focus]. Use the Opportunity Brief and Market Context to decode how priority consumer cohorts actually behave across the journey. Focus on what people DO (rituals, routines, frictions, triggers), not generic attitudes. Aim every insight at strategy levers: new digital experiences, programs, functionality, AI, personalization, UX, CRM/loyalty, content, and service design. Use strategic, executive-ready prose; cite credible sources where applicable; label inferences as [Assumption].

Required sections

Executive Summary (6–8 bullets)

- Most material cross-segment behavior shifts
- What is now table stakes vs. where surprise-delight wins
- 3–5 implications that set up our win themes

Segment Deep Dives (choose 2-3 segments relevant to the pursuit)

For each segment (2-3 pages):

- Rituals, Routines, and Intent Patterns: daily/weekly/seasonal usage; discovery → trial → usage mechanics; habit vs. planned behavior.
- Emotional Drivers and Behavioral Motivations: needs/tensions (e.g., speed vs. care, convenience vs. control); trust and anxiety patterns.
- Digital Behaviors and UX Expectations: device mix, feature expectations, automation tolerance; breakpoints that trigger abandonment.
- Social Influence and Discovery: creators/community/algorithms/friends; what earns share/save/subscribe.
- Spend, Subscription, and Loyalty: price sensitivity; bundles; rewards; status dynamics; churn triggers.
- Technology Fluency & Interfaces: comfort with voice, wearables, kiosks, AR/AI; expectations for predictive/smart flows.
- So what for Strategy: 3-5 bullets mapped to levers (Personalization, UX, CRM/Loyalty, Content, Service).

Emerging Behavioral Themes Across Segments (3-5)

- Clearly named, evidence-backed themes that cut across cohorts (e.g., ritual reinforcement in loyalty, real-time relevance, hybrid IRL+digital).
- For each theme, add "Design/Test Ideas" (2 examples) and the key KPI it should move.

Strategic Implications for [Brand Name]

- Translate behaviors into strategy moves across: personalization logic, journey/UX architecture, CRM/loyalty mechanics, content model, service design.
- Map each implication to likely evaluation criteria/KPIs and to our feasible capabilities (data, platform, operations).

Also include the following artifacts:

Theme-to-Strategy Map (table)

Behavioral Theme	Strategy Lever	Example Move	Required Enablers
(data/tech/ops)			KPI

Rules

- Use plain English. Avoid clichés. No em dashes.
- Where you infer from adjacent categories, label [Assumption] and keep it reasonable.
- Keep recommendations specific and testable; avoid abstract “be more personalized” statements.

Inputs (paste below)

- Opportunity Brief (pains, criteria, KPIs)
- Market Context highlights (Step 2.1)
- Priority segments (2-3): [list or ask the model to propose]

Quality bar

- **Behavior-to-strategy line of sight:** Every insight maps to a **strategy lever** and KPI.
- **Segment relevance:** Only the **2–3 segments** that matter for the pursuit; depth over breadth.
- **Friction clarity:** Top frictions tied to fixes with **effort/impact** to help prioritize.
- **Personalization-ready:** Grid includes **signals/logic/content/metric** (not just ideas).

Step 2.3 — Competitive Landscape

Goal

Deliver a research-grade, source-cited analysis of the competitive environment in which [Brand Name] operates—spanning direct competitors, adjacent innovators, and emerging disruptors. Connect upstream market forces (Step 2.1) and live consumer behaviors (Step 2.2) to the experience and platform moves brands are making now. Show where the bar is rising, where gaps exist, and how our prospect can establish a clear digital advantage.

Owners and RACI

- **Pursuit Lead (Responsible / Accountable)** generates research using prompts and their own discretion to determine what is important for this prospect.
- **Strategy Lead / Solution Lead / Experience Lead (Consulted)** validate UX and journey implications.
- **Executive Sponsor (Informed)** aligns on tone, risk posture, and target positioning.

Tools

- **Primary:** ChatGPT (drafting & synthesis)
- **Support (optional):** Claude (cross-check & triangulation)

Inputs

- **Opportunity Brief**
- Known Competitor list (if available)
- Step 2.3 Prompt

Outputs

- **Executive Summary** (why the bar is rising; what wins now)
- **Digital Maturity Landscape** (tier placement + narrative rationale)
- **Competitive Field Overview (table)**
- **Detailed Competitive Audits** (3–5 brands; consistent subheads)
- **Feature/Capability Comparison Matrix** (what exists vs. gaps; depth notes)
- **Cross-Brand Patterns & Emerging Themes** (5–7)
- **Strategic Implications for prospect** (Table Stakes / Differentiators / Innovation Bets / Enablers)
- **Bibliography & Evidence Annex** (links, dates, screenshots where allowed)

Step process

1) Frame & collect — 5 min

Revise the Prompt (below) to reflect the Opportunity Brief.

2) Generate first pass — 15 min

Run the revised **Prompt** which will ask for: Executive Summary, Maturity Landscape, Competitive Audits (3–5), Field Overview table, Feature/Capability Comparison Matrix, Cross-Brand Patterns, Strategic Implications, Opportunity Map.

3) Tighten & aim at strategy — 7 min

Compress generic sections; expand any areas that need more depth. Ensure every competitive insight is valid (especially for logged-in experiences) and leads to a strategic recommendation for positioning strategies against their competition.

4) Package — 3 min

Add a 1-page Executive Summary, paste tables at the end, and include all cited references.

Prompt

You are a senior strategist preparing a Competitive Landscape Analysis for a digital transformation proposal to [Brand Name], a [business maturity] company in [Industry/Category], focused on [Geographic Focus]. Your goal: a source-cited, strategy-grade report that maps the digital landscape and identifies meaningful opportunities for [Brand Name] to differentiate, modernize, or disrupt with ties back to research conducted in Step 2.1 Market Research and Step 2.2 Consumer Behaviors.

Global rules

- Use structured, executive-ready prose (plain English). No em dashes.
- Cite evidence (source name + date ≤18 months when possible). Tag [Assumption] or [Forecast] explicitly when used.
- Benchmark against our primary use case: [Primary Use Case or Objective].
- Tie every finding to at least one Consumer Theme from Step 2.2 (e.g., real-time relevance, ritual reinforcement, hybrid IRL+digital, transparency/control).

Required sections

Executive Summary (6-8 bullets)

- Who sets the pace and why
- Where the bar is rising (experience, data, platform, loyalty)
- Where category behavior is shifting faster than brand execution
- What [Brand Name] risks by status quo
- 3-5 implications that will seed our win themes

Digital Maturity Landscape

- Place [Brand Name] and competitors on a tailored maturity curve:
Initiation → Foundation → Acceleration → Innovation
- Provide a narrative rationale for each placement (capability signals, cadence of releases, platform posture).
- State where [Brand Name] is today and the next target tier with rationale.

Competitive Field Overview (table)

Columns: Brand | Tier (I/F/A/In) | Standout strengths (this context) | UX gaps/frictions | Platform/CDP/CRM posture | Loyalty/Personalization signals | Notes/Evidence

Detailed Competitive Audits (3-5 brands; 1.5-2 pages each)

A) Brand Overview & Positioning: business model, value prop, go-to-market.

B) Digital Experience & Platform Audit: web/app/omni UX; performance, accessibility; content & feature completeness; app store ratings/sentiment (if applicable).

- C) Personalization/CRM/Loyalty/Workflow: depth of targeting, orchestration, lifecycle communications, status-tier mechanics, or internal digitization relevant to our use case.
- D) Innovation Signals: AI/ML use cases, CDP/real-time orchestration, composable/headless, API ecosystem, automation/self-service, partner plays.
- E) Strengths & Differentiators: what they do well and why it matters (tie to consumer themes).
- F) Gaps & Frictions: UX flaws, disconnected journeys, dated loyalty, weak trust signals, org constraints.

Feature/Capability Comparison Matrix (table)

Rows: Key capabilities aligned to our use case (e.g., account linking, personalized home, ritual reinforcement mechanics, real-time offers, progressive profiling, service automation)

Columns: Capability | Consumer Theme served | [Brand Name] | Competitor A | Competitor B | Competitor C | Depth notes/evidence

Cross-Brand Patterns & Emerging Themes (5-7)

- Synthesize convergences/divergences (e.g., API-first composability, content+commerce blending, emotional loyalty, predictive service, simplification vs. feature bloat).
- For each, include: Why it wins now • Example brand • KPI it moves • Link to Step 2.2 theme.

Strategic Implications for [Brand Name]

Provide recommendations aligned to maturity and use case:

- Table Stakes (6-12 months): foundational capabilities to meet rising expectations.
- Differentiators (6-12 months): signature experiences that align to brand and break through.
- Innovation Bets (12-24 months): high-upside pilots/incubations.

- Infrastructure Enablers: data, CDP/CRM, platform, and operating model investments required.

Map each recommendation to: Consumer Theme • KPI • Enablers (data/tech/ops) • Timeframe.

Bibliography & Evidence Annex

Sources with titles, publishers, dates, and links; include screenshots/quotes where permissible.

Notes

- If data for [Geographic Focus] is missing, use nearest proxy and tag [Assumption].
- Keep findings decision-useful; avoid brand lore or generic claims.

Quality bar

- **Recency & evidence:** Majority of claims backed by ≤18-month sources or direct product evidence; older items tagged.
- **Validation:** Ensure any claims about logged-in experiences are valid.
- **Comparability:** Same subheads and criteria across brands; apples-to-apples where possible.
- **Behavioral linkage:** Each finding ties to at least one **Step 2.2** consumer theme and a KPI.
- **Actionability:** Clear **Table Stakes / Differentiators / Bets / Enablers** with timeframes and enablers.
- **Traceability:** Matrices and annex link claims to sources/screens.

Step 3.1 — Strategic Opportunity Zones

Goal

Synthesize all prior research into 4-5 high-leverage Opportunity Zones that guide the pitch strategy, strategic frameworks, and downstream roadmap. These are not features or point recommendations; they are strategic territories where behavior, technology, and business value intersect—showing where Bounteous can help [Brand Name] differentiate, accelerate, or disrupt.

Each Opportunity Zone should:

- Be grounded in **market trends, consumer behavior, competitor dynamics, and platform readiness**
- Represent a **clear friction, white space, or underperformance**
- Be **broad enough** to inspire strategy, UX, content, platform, and data ideation
- Be **focused enough** to guide investment, messaging, and roadmap prioritization

Owners and RACI

- **Pursuit Lead (Responsible / Accountable)** generates strategic Opportunity Zones using prompts and their own discretion to determine what is important for this prospect.
- **Strategy / Solution Lead (Consulted)** pressure-tests clarity, breadth vs focus, and journey fit
- **Executive Sponsor (Informed)** aligns on ambition, risk posture, and investment signals

Tools

- **Primary:** ChatGPT

Inputs

- **Step 1.1 — Opportunity Brief**
- **Step 2.1 — Market & Tech Trends**
- **Step 2.2 — Consumer Behavior & Psychology**
- **Step 2.3 — Competitive Landscape**
- **Step 3.1 Prompt**

Outputs

- **Strategic Opportunity Map:** 4-5 named Opportunity Zones (structure below)
- **Theme Linkage Table:** Zone → Consumer Theme (2.2) → Competitive Gap (2.3) → Trend/Signal (2.1)
- **Dependencies & Enablers List:** data, platform, ops, governance

Step process

1) Frame & collect — 5 min

Revise the Prompt (below) to reflect the Opportunity Brief. Provide your own strategic input around highest priority market research trends, consumer behaviors and competitive gaps to inform the subsequent research.

2) Generate candidate zones — 15 min

Run the revised **Prompt** to produce 4-5 Opportunity Zones, each with: What it is, Why now, How it supports the clients growth.

3) Prioritize & narrow — 7 min

Use your discretion to prioritize the top 3 Opportunity Zones based on your understanding of the client and what will resonate, and what is supported by the research.

4) Package — 3 min

Finalize the **Strategic Opportunity Map**, scoring table, linkage table, and a short synthesis that sets up the next steps.

Prompt

You are a senior strategist preparing a Strategic Opportunity Map for [Brand Name], a [business maturity] company in [Industry/Category] focused on [Geographic Focus], with a primary transformation objective of [Primary Goal or Use Case].

Using the prior research (Step 2.1 Market & Tech Trends, Step 2.2 Consumer Behavior & Psychology, Step 2.3 Competitive Landscape) plus the Opportunity Brief, synthesize 4-5 Opportunity Zones. These are strategic territories (not features) where customer demand, behavioral friction, competitive gaps, and platform enablers converge.

Global rules

- Write in strategic, executive-ready prose. Plain English. No em dashes.
- Ground every zone in specific evidence from Steps 2.1-2.3; if inferred, label [Assumption].
- Make each zone broad enough for strategy/UX/content/platform/data, yet focused enough to guide investment and roadmap.

For each Opportunity Zone, return:

- 1) Opportunity Name
- 2) What the Opportunity Is (strategic territory + core friction/whitespace)
- 3) Why It Matters Now (urgency, risk of inaction, competitive pressure, business growth/upside)
- 4) Where Bounteous Can Play a Unique Role (capabilities + strategy→execution bridge)
- 5) Evidence Linkage (one line): Consumer Theme (2.2) • Competitive Gap (2.3) • Trend/Signal (2.1)
- 6) Enablers & Dependencies (data, platform, ops)
- 7) KPIs Moved (tie to evaluation criteria)

Then provide:

Theme Linkage Table

Columns: Zone | Consumer Theme (2.2) | Competitive Gap (2.3) |
Trend/Signal (2.1)

Short Synthesis (1-2 paragraphs)

Unifying themes across zones; how they roll into
flywheels/frameworks/activation concepts next; what business and
customer value [Brand Name] can unlock (loyalty, time-to-value,
retention, differentiation).

Quality bar

- **Research-grounded:** Every zone cites a consumer theme, a competitive gap, and a market/tech signal
- **Action-oriented:** Each zone lists concrete **enablers & dependencies** and the **KPIs** it will move
- **Prioritized:** Scoring matrix distinguishes near-term table-stakes from mid-term differentiators and longer-term bets
- **Strategically framed:** Zones read like territories, not features; breadth enables ideation, focus enables investment
- **Bridges forward:** Synthesis clearly sets up the **frameworks/flywheels and concepts** that follow

Step 3.2 — Strategic Recommendations

Goal

Translate insight into action. Turn the selected Opportunity Zones (Step 3.1) into a branded, behaviorally driven operating model that shows exactly how Bounteous will help [Brand Name] create, reinforce, and scale digital value.

We are producing a **buildable system**, not a story. The output is a framework that spells out the components, handoffs, data and platform enablers, and the specific moves that change customer behavior and deliver business outcomes. This becomes the shared blueprint for activation concepts, UX, roadmap, and platform planning.

- Produce several **candidate frameworks**, then **pick one lead framework** for the pitch; note alternates in the appendix. A framework may span multiple Opportunity Zones; map primary and secondary linkages explicitly.
- **Behavior → Business Value → Platform** linkage is explicit in every component.
- **4–6 components** per framework (except the No Framework option).
- **4–5 tangible recommendations per component** with KPI, owner, and enablement.
- **Implementation ready:** interlocks and handoffs are clear; enablers are named; a payoff and KPI map shows what moves when.

How we choose the Framework

The **Pursuit Lead explores multiple framework options** (Flywheel, Pillars, Digital Maturity Model, Value Pool, or No Framework with Recommendations) and **selects the single model that best supports the pitch** based on:

- Fit to Opportunity Zones and Consumer Themes
- Clarity of executive story and KPI impact
- Feasibility on the client's stack and operating model
- Ability to scale and sustain value

What this achieves

- **Clarity of value creation:** traces behavior → KPI → platform capability
- **Shared playbook:** one operating model the full team can execute
- **Decision discipline:** focuses effort on the work that drives outcomes
- **Executability:** converts research into concrete features, programs, and rituals with owners
- **Measurement:** defines which KPIs each component moves and how progress is proven

Owners and RACI

- **Pursuit Lead (Responsible / Accountable)** generates strategic framework and recommendations using prompts and their own discretion to determine what will resonate and drive the intended outcomes for this prospect.
- **Applicable Practice or Competency Leads / Solution Lead (Consulted):** pressure test framework logic and feasibility of recommendations; build upon draft with own ideas.
- **Executive Sponsor (Informed):** aligns ambition, risk posture, and executive messaging

Tools and Inputs

- **Primary tools:** ChatGPT for synthesis and drafting
- **Support:** Step 3.1 Opportunity Map; Steps 2.1–2.3 outputs; RFP excerpts; platform context (Adobe, Salesforce, etc.)
- **Inputs:** Opportunity Zones, Consumer Themes, Competitive Gaps, Market and Tech Signals, tech constraints, primary transformation goals

Outputs

- **One lead framework** that organizes the chosen Opportunity Zones
- For the selected framework:
 - **4–6 components** with purpose, interlocks, and enablement
 - **4–5 recommendations per component** (features, programs, initiatives) with KPI and owner
 - **Strategic Payoff and KPI Map** across 6–12 and 12–24 months
 - **Enablement notes** for data and signals, decisioning (CDP or AJO), content ops (CMS), CRM and loyalty, integrations and APIs, governance
 - **Why Bounteous** statement mapped to the client's context
- **Appendices as needed:** Interaction map and handoffs for Pillars, Progress gates for Maturity, Mini business cases for Value Pools, Prioritization rubric for No Framework

Step process

1) Frame — 5 minutes

Revise each Framework prompt using the Opportunity Brief to be specific to the client. Note any priority Consumer Themes, Competitive Gaps, and platform enablers or constraints you feel are important to build from. Choose two or three framework model types to try.

2) Generate — 15 minutes

Run the **revised prompt** below for each candidate. Require 4–6 components, 4–5 recommendations per component, a KPI map, enablement, and Why Bounteous.

3) Tighten — 7 minutes

Make every recommendation a **specific feature, program, or initiative** with a KPI and enablement.

4) Package — 3 minutes

Pick the **lead framework** that best supports the pitch. Add the KPI map and Why Bounteous.

Framework Options

- **Flywheel:** value compounds with usage and data (personalization, loyalty habit)
- **Pillars:** parallel capabilities must coordinate (content ops, decisioning, service)
- **Digital Maturity Model:** staged advancement with proof gates and roadmap needs
- **Value Pool:** outcomes and ROI clarity are the primary executive lens
- **No Framework:** narrow OZ or speed is critical; go straight to buildable actions

Prompts

Flywheel

You are a senior strategist creating a branded FLYWHEEL framework for [Brand Name], a [business maturity] company in [Industry/Category] operating in [Geographic Focus].

Inputs

- Opportunity Zones (Step 3.1): [paste list]
- Consumer Themes (Step 2.2): [paste]
- Competitive Gaps (Step 2.3): [paste]
- Market/Tech Signals (Step 2.1): [paste]
- Platform Alignment: [Adobe/Salesforce/CDP/AJO/CMS/Loyalty/etc.]

TASK

Create ONE flywheel operating model that shows how [Brand Name] capitalizes on the Opportunity Zones, with 3-5 components that continuously reinforce each other. For EACH component provide 4-5 tangible recommendations.

Formatting rules

- Plain English. Executive-ready. No em dashes.
- Each recommendation must be speakable in 2 lines and include:
what it is • how it works for the consumer • business impact (KPI).
- Tag any inference as [Assumption].

Structure

```

## [Framework Name] – [Short Subtitle]

**Intro (short):** The business/behavior problem this flywheel
solves; why now; risk of inaction. Reference relevant Opportunity
Zones and Consumer Themes.

### Components (3-5)

- **[Component A]**

    Function/behavior driven: [e.g., capture 1P data, reinforce habit]

    How it works (3-4 lines): What the component does, the consumer
    behavior it changes, and the signal/trigger that activates it.

    Enablement notes: data/signals • decisioning (CDP/AJO) • content
    ops (CMS) • integrations/APIs • governance

    Recommendations (4-5):

    - [Action] – how it works for the consumer; **KPI:** [metric].
    *(Linked OZ: [name]; Theme: [name]; Enablement: [data/tech/ops])*

    - [Action] – how it works for the consumer; **KPI:** [metric].
    *(Linked OZ/Theme/Enablement)*

    - [Action] – how it works for the consumer; **KPI:** [metric].
    *(Linked OZ/Theme/Enablement)*

    - [Action] – how it works for the consumer; **KPI:** [metric].
    *(Linked OZ/Theme/Enablement)*

    Behavior → Lever → KPI: [one line]

- **[Component B]**

    [repeat block]

- **[Component C]**

```

[repeat block]

Loop Logic

Explain how A drives B, B drives C, and C feeds back to A; include the key signals and triggers that make the loop compound (e.g., more 1P data → better models → higher relevance → more engagement → more data).

Strategic Payoff (KPI Map)

Component | Primary KPIs | Secondary KPIs | Timeframe (6-12m / 12-24m)

Why Bounteous

Bullets on why our blend of strategy, UX, data, platforms, and content ops is uniquely suited to implement and scale this flywheel.

Notes

- Where inputs are missing, label [Assumption] and proceed.
- Keep every recommendation explicitly linked to an Opportunity Zone and a Consumer Theme.

Strategic Pillars

You are a senior strategist creating a branded PILLARS framework for [Brand Name], a [business maturity] company in [Industry/Category] operating in [Geographic Focus].

Context

- Opportunity Zones (Step 3.1): [paste]
- Consumer Themes (Step 2.2): [paste]
- Competitive Gaps (Step 2.3): [paste]
- Market/Tech Signals (Step 2.1): [paste]
- Platform Alignment & Constraints:
[Adobe/Salesforce/CDP/AJO/CMS/Loyalty/etc.]

TASK

Create ONE pillars operating model with 3-5 pillars that WORK TOGETHER (not silos). For EACH pillar, provide 4-5 tangible recommendations and make the interlocks explicit (inputs, handoffs, shared services). Link every recommendation to a source Opportunity Zone and/or Consumer Theme.

Formatting rules

- Plain English. Executive-ready. No em dashes.
- Each recommendation must be speakable in ~2 lines and include: what it is • why now • KPI it moves • Why Bounteous (strategy→UX→platform).
- Label any inference as [Assumption].

Structure

```

## [Framework Name] – [Short Subtitle]

**Intro (short):** The business/behavioral problem these pillars
address; why now; risk of inaction. Reference relevant Consumer
Themes and Competitive Gaps.

### Pillars (3-5)

- **[Pillar A – short name]**

  *Function/behavior driven:* [e.g., reduce friction, raise
  relevance, capture 1P data]

  *How it works (3-4 lines):* What the pillar does, which consumer
  behavior it changes, and the signal/trigger that activates it.

  *Interlocks:* Inputs from [pillar(s)] → Outputs to [pillar(s)] •
  Shared services: [CDP/AJO/CMS/Loyalty]

  *Interface contract:* **Consumes** [events/profile/flags] •
  **Produces** [decisions/offers/content updates/audiences] •
  **Exposes** [API/webhook/audience/CMS slot]

  *Enablement notes:* data/signals • decisioning (CDP/AJO) • content
  ops (CMS) • integrations/APIs • governance • 90-day starter

  *Recommendations (4-5):*

    - [Action] – why now; **KPI:** [metric]. *(Linked OZ: [name];
    Theme: [name]; Enablement: [data/tech/ops])*

    - [Action] – why now; **KPI:** [metric]. *(Linked
    OZ/Theme/Enablement)*

    - [Action] – why now; **KPI:** [metric]. *(Linked
    OZ/Theme/Enablement)*

    - [Action] – why now; **KPI:** [metric]. *(Linked
    OZ/Theme/Enablement)*

  *Behavior → Lever → KPI:* [one line]

- **[Pillar B]**

  (repeat full block)

```

- **[Pillar C]**

(repeat; add D/E if needed)

Component Interaction Map (text)

For each pillar, list **Inputs → Process → Outputs**, and show **handoffs and triggers** between pillars (name the event/condition).

Sequence & Handoffs (swimlane narrative)

Lanes: **Customer • Data/Decisioning • Experience • CRM/Loyalty • Ops/Service**. Describe step-by-step flow for a representative journey; mark **sync/async**, **owner** of each step, and SLA/latency expectations.

Strategic Payoff (KPI Map)

Pillar | Primary KPIs | Secondary KPIs | Timeframe (6-12m / 12-24m)

Governance & Control Plane

Who tunes rules/models, how experiments are run, cadence for content/segment promotion, approvals, and monthly operating ritual (what gets reviewed and by whom).

Why Bounteous

Bullets on why our blend of strategy, UX, data, platforms, and content ops is uniquely suited to implement and scale this pillars model.

Notes

- Where inputs are missing, label [Assumption] and proceed.
- Keep every recommendation explicitly linked to an Opportunity Zone and a Consumer Theme.

Digital Maturity Model Roadmap

You are a senior strategist creating a DIGITAL MATURITY MODEL ROADMAP for [Brand Name], a [business maturity] company in [Industry/Category] operating in [Geographic Focus].

Context

- Opportunity Zones (Step 3.1): [paste]
- Consumer Themes (Step 2.2): [paste]
- Competitive Gaps (Step 2.3): [paste]
- Market/Tech Signals (Step 2.1): [paste]
- Platform Alignment & Constraints:
[Adobe/Salesforce/CDP/AJO/CMS/Loyalty/etc.]
- Current State Snapshot (brief): [teams/process/data/tech notes]

TASK

Create a maturity model with FOUR levels—**Initiation, Foundation, Acceleration, Innovation**—that define the journey from today to target state. For EACH level, provide:

- **Entry Criteria** (what's true today)
- **Exit Criteria (Proof Gate)** to move to the next level
- **Core Capabilities** the org must reliably perform
- **Enablers** (data/signals, decisioning/CDP, CMS/content ops, CRM/loyalty, integrations/APIs, governance)
- **Operating Practices** (experimentation cadence, content ops rhythm, journey tuning)
- **Sample OKRs** (2-3 with metrics)
- **Guardrails** (risks to avoid)

- **Specific Recommendations (4-5)** that are concrete **features, programs, or initiatives** designed to MOVE FROM THIS LEVEL TO THE NEXT

- For each recommendation, include: **Action** (feature/program/initiative) • **Why now** • **KPI moved** • **Enablement** (data/tech/ops) • **Owner (role)** • **Linked Opportunity Zone** • **Consumer Theme** • **"Why Bounteous"** (strategy→UX→platform)

Formatting rules

- Plain English. Executive-ready. No em dashes.
- Keep each recommendation speakable in ~2 lines.
- Tag any inference as [Assumption].

Structure

[Model Name] – [Short Subtitle]

Linked Opportunity Zones: [names]

Intro (short): Why staged progression is needed now; how it ties to executive goals; risks of skipping stages.

Levels (4)

1) **Initiation**

Entry Criteria: [signals, e.g., basic digital presence, limited 1P data, manual comms]

Exit Criteria (Proof Gate): [e.g., >40% authenticated traffic, baseline profile schema live, first automated lifecycle live with lift ≥X%]

Core Capabilities: [bullets]

Enablers: data/signals • CDP/decisioning • CMS/content ops • CRM/loyalty • integrations/APIs • governance

****Operating Practices:**** [e.g., weekly experiment standup; monthly content governance]

****Sample OKRs (2-3):**** [objective + KRs with baseline→target]

****Guardrails:**** [risks to avoid, e.g., over-targeting without consent, content debt]

****Recommendations (4-5) – TO REACH FOUNDATION:****

- [Feature/Program/Initiative] – why now; ****KPI:**** [metric];
****Enablement:**** [data/tech/ops]; ****Owner:**** [role]; ****OZ/Theme:**** [names]; ****Why Bounteous****

- [..repeat 3-4 more..]

****Backlog (90 days):**** 5-7 items with Owner and dependency notes

2) ****Foundation****

****Entry Criteria:**** [from Initiation gate]

****Exit Criteria (Proof Gate):**** [e.g., real-time decisioning for top journeys; <250ms decision latency; 70% profile coverage for priority attributes]

****Core Capabilities / Enablers / Practices / OKRs / Guardrails****

****Recommendations (4-5) – TO REACH ACCELERATION:****

- [Feature/Program/Initiative] – why now; ****KPI****; ****Enablement****;
****Owner****; ****OZ/Theme****; ****Why Bounteous****

- [..repeat..]

****Backlog (6-12 months):**** 6-10 items with Owner and dependencies

3) ****Acceleration****

****Entry Criteria:**** [from Foundation gate]

****Exit Criteria (Proof Gate):**** [e.g., 3+ AI-driven journeys at lift ≥Y%; automated content assembly; cross-channel frequency governance in place]

****Core Capabilities / Enablers / Practices / OKRs / Guardrails****

****Recommendations (4-5) – TO REACH INNOVATION:****

- [Feature/Program/Initiative] – why now; **KPI**; **Enablement**;
Owner; **OZ/Theme**; **Why Bounteous**

- [..repeat..]

Backlog (12-18 months): 6-10 items with Owner and dependencies

4) **Innovation**

Entry Criteria: [from Acceleration gate]

Exit Criteria (Proof Gate / Steady State): [e.g., self-optimizing journeys; adaptive offers; partner ecosystems; measurable LTV uplift]

Core Capabilities / Enablers / Practices / OKRs / Guardrails

Recommendations (4-5) – TO SCALE & MOAT:

- [Feature/Program/Initiative] – why now; **KPI**; **Enablement**;
Owner; **OZ/Theme**; **Why Bounteous**

- [..repeat..]

Backlog (18-24 months): 6-10 items with Owner and dependencies

Progression Logic

- **Promotion Mechanics:** the specific KPI thresholds and technical proofs that unlock the next level

- **Readiness Checks:** data quality, model accuracy, content health, ops capacity

- **Decision Cadence:** who approves progression; how frequently

Strategic Payoff (KPI Ladder)

Level | Primary KPIs expected to move | Secondary KPIs | Evidence type (A/B, cohort, model lift, latency)

Capability Heatmap (optional)

Capabilities (rows) × Levels (columns) with depth: None / Baseline / Consistent / Advanced

RACI & Governance

Owners for decisioning/rules, content ops, segmentation, experimentation, data contracts, privacy/compliance; monthly operating ritual

Why Bounteous

How we accelerate progression with strategy → UX → platforms (CDP/AJO/CMS/loyalty) and change ops; relevant client proof.

Notes

- Every recommendation must be a **specific feature, program, or initiative** intended to MOVE UP a level.
- Tie each recommendation to an **Opportunity Zone** and **Consumer Theme**.
- Label [Assumption] where inputs are missing, then proceed.

Value Pool Framework

You are a senior strategist creating a VALUE POOL framework for [Brand Name], a [business maturity] company in [Industry/Category] operating in [Geographic Focus].

Context

- Opportunity Zones (Step 3.1): [paste list]
- Consumer Themes (Step 2.2): [paste]
- Competitive Gaps (Step 2.3): [paste]
- Market/Tech Signals (Step 2.1): [paste]
- Platform Alignment & Constraints:
[Adobe/Salesforce/CDP/AJO/CMS/Loyalty/etc.]
- Baseline KPI Snapshot (if available): [CAC, CVR, AOV, LTV, NPS/CSAT, CTS, DAU/MAU, churn]

TASK

Organize the strategy by 3-4 OUTCOME-BASED VALUE POOLS (e.g., Acquire Efficiently, Grow LTV, Reduce Cost-to-Serve, Speed to Market). For EACH value pool provide 4-5 tangible recommendations and a MINI BUSINESS CASE. Link every recommendation to a source Opportunity Zone and at least one Consumer Theme.

Formatting rules

- Plain English. Executive-ready. No em dashes.
- Each recommendation must be speakable in ~2 lines and include:
action • why now (OZ/Theme/Gap) • KPI moved • directional value math • Why Bounteous (strategy→UX→platform).
- Label any inference as [Assumption].

Structure

```

## [Framework Name] – [Short Subtitle]

**Linked Opportunity Zones:** [names]

**Intro (short):** Why an outcome-based organization fits this brief;
link to executive priorities and risks of maintaining status quo.

### Value Pools (3-4)

- **[Pool A: Outcome name (e.g., Grow LTV)]**

  **KPI focus:** [e.g., LTV, AOV, frequency, retention, attach rate]

  **Levers:** [personalization, journey fixes, loyalty mechanics,
content ops, service automation]

  **Mini business case (directional):**

    - Assumptions: [baseline metric(s)], [target lift range], [affected
population %]

    - Value math example:  $\Delta LTV = (\text{Baseline LTV} \times \text{lift \%}) \times \text{affected customers}$ ; or  $\text{Gross margin impact} = (\text{AOV} \times \text{CVR lift} \times \text{traffic}) \times \text{margin \%}$ .

    **Enablement notes:** data/signals • decisioning (CDP/AJO) •
content ops (CMS) • CRM/loyalty • integrations/APIs • governance •
90-day starter

  **Recommendations (4-5):**

    - [Action] – why now (OZ/Theme/Gap); **KPI:** [metric]; **Value
math:** [one-liner]; **Why Bounteous:** [capability fit]

    - [Action] – why now; **KPI:** [metric]; **Value math:** [one-
liner]; **Why Bounteous**

    - [Action] – why now; **KPI:** [metric]; **Value math:** [one-
liner]; **Why Bounteous**

    - [Action] – why now; **KPI:** [metric]; **Value math:** [one-
liner]; **Why Bounteous**

  **Behavior → Lever → KPI:** [one line tying consumer behavior to
lever and KPI]

```

```

- **[Pool B: Outcome name (e.g., Acquire Efficiently)]**

  **KPI focus:** [CAC, CVR, CPA, quality lead rate]

  **Levers:** [progressive profiling, predictive audiences, landing
flow simplification, incentive optimization]

  **Mini business case (directional):**

    - Assumptions: [baseline CVR], [paid mix], [traffic], [cost/lead]

    - Value math example: `Media efficiency = (CVR lift × same spend) →
CPA ↓`; `Revenue = traffic × CVR × AOV`

  **Enablement notes:** [...]

  **Recommendations (4-5):** [same format]

  **Behavior → Lever → KPI:** [one line]

- **[Pool C: Outcome name (e.g., Reduce Cost-to-Serve)]**

  **KPI focus:** [CTS, call deflection %, AHT, FCR, CSAT/NPS]

  **Levers:** [self-service flows, knowledge orchestration, proactive
notifications, agent assist, policy automation]

  **Mini business case (directional):**

    - Assumptions: [contact volume], [deflection target],
[cost/interaction]

    - Value math example: `Savings = (deflected contacts ×
cost/interaction)`

  **Enablement notes:** [...]

  **Recommendations (4-5):** [same format]

  **Behavior → Lever → KPI:** [one line]

- **[Pool D: Outcome name (optional, e.g., Speed to Market)]**

  **KPI focus:** [release cadence, time-to-change, % templated
content, experiment velocity]

```

****Levers:**** [componentized UX, headless CMS patterns, A/B ops, design tokens, CLI/tooling]

****Mini business case (directional):****

- Assumptions: [current cadence], [target], [cost/time saved]
- Value math example: `Saved eng hours × loaded rate` or `faster cycles × expected uplift`

****Enablement notes:**** [...]

****Recommendations (4-5):**** [same format]

****Behavior → Lever → KPI:**** [one line]

Portfolio View

Table: Value Pool | Primary KPI | Expected Impact (range) | Feasibility (data/tech/ops) | Confidence | Timeframe (90d/6-12/12-24m) | Dependencies

Strategic Payoff

Explain how these value pools balance near-term ROI with long-term moat (e.g., more 1P data → better models → higher relevance → LTV growth; self-service → lower CTS → reinvest savings in acquisition).

Why Bounteous

Brief bullets on our integrated advantage (strategy, UX, data, platforms, content ops, loyalty) mapped to each value pool.

Notes

- Tie every recommendation explicitly to a ****source Opportunity Zone**** and at least one ****Consumer Theme****.
- Where baselines are missing, label [Assumption], use proxy ranges, and show the math transparently.

No Framework / Just Recommendations

You are a senior strategist producing a focused set of TACTICAL RECOMMENDATIONS for [Brand Name], a [business maturity] company in [Industry/Category] in [Geographic Focus], organized BY OPPORTUNITY ZONE (no framework).

Context

- Opportunity Zones (Step 3.1): [paste list with 1-2 sentence descriptors]
- Consumer Themes (Step 2.2): [paste]
- Competitive Gaps (Step 2.3): [paste]
- Market/Tech Signals (Step 2.1): [paste]
- Platform Alignment & Constraints:
[Adobe/Salesforce/CDP/AJO/CMS/Loyalty/etc.]
- Baselines (if available): [CVR, AOV, LTV, CAC, CTS, DAU/MAU, churn, NPS/CSAT]

TASK

Deliver ****15-25 execution-ready recommendations****, grouped under their ****source Opportunity Zone****. Each recommendation must cover: the recommendation, how it works, consumer experience, business outcomes, enablement (data/tech/ops), Why Bounteous. No slide-ware—make these buildable.

Formatting rules

- Plain English. Executive-ready. No em dashes.
- Label any inference as [Assumption].

Structure

Tactical Recommendations – Organized by Opportunity Zone

OZ-1: [Opportunity Zone name]

1) [Action] – the recommendation, how it works, consumer experience, business outcomes (eg. 3-5% lift) ,enablement (data/tech/ops), Why Bounteous. No slide-ware—make these buildable.

Step 4.1 — POV Synthesis

*Manual Process Step

Purpose

This manual process is a human-in-the-loop step. The Pursuit Lead manually reviews everything that has been created so far, selects only the most important sections of content, and organizes those sections into one cohesive point-of-view narrative. The narrative must cover three things. First, it must explain what is happening in the market, with consumers, and among competitors (the Insights). Second, it must explain why those insights matter and what must change (the Implications). Third, it must explain what we recommend doing next by connecting Opportunity Zones to the selected Framework and to specific recommendations (the Recommendations). You should not run prompts or conduct new research at this stage. Your task is to choose and assemble the story. The output is long-form narrative content that will be converted into slides in the next step.

You will produce a single, long-form point-of-view narrative by copying over the strongest content blocks from previous steps and lightly stitching them together for flow. The narrative must follow this order: **Insights (Market • Consumer • Competitive)**, then **Implications (“so what”)**, and then **Recommendations (Opportunity Zones → Framework(s) → Specific Recommendations)**.

Owners and RACI

- **Pursuit Lead (Owner/Accountable)** reviews all prior research and content generated, selects the most relevant and tangible information, and assembles a single narrative covering Insights → Implications → Recommendations.
- **Strategy Lead (Consulted)** pressure-tests the logic, ensures implications are sound, and aligns recommendations to KPI movement.
- **Solution Lead (Consulted)** validates feasibility, enablement notes, and platform/data dependencies tied to each recommendation.
- **Executive Sponsor (Informed)** aligns on tone, risk posture, and where to place strategic bets.

Inputs

Use the following materials and keep them open side by side while you work.

- **Step 2.1 Market Context:** Include your three strongest sections.
- **Step 2.2 Behavior & Psychology:** Include your three strongest sections.
- **Step 2.3 Competitive Landscape:** Include the digital maturity model with competitors mapped and three to four competitor deep dives.
- **Step 3.1 Opportunity Zones:** Use your top three to four zones as context, even though you will ultimately select one zone to lead the story.

- **Step 3.2 Selected Framework:** Include the framework name, three to five components, and four to six key recommendations with KPIs and time horizons.

Step Process

1) Pull the most relevant, important, and insightful sections of content into a single document (40–45 minutes)

Copy sections verbatim or with minor smoothing for grammar and tense. Do not copy bullets; copy full sections or short paragraphs. When a section cites data, keep the source and date in line.

A) Insights

- **Market (two to three sections).** Choose dated, directional content with no fluff. Make sure each section includes the explicit signal and one bridging line that helps a reader understand why it matters. Add a parenthetical citation such as “(NPD, 08/25)”.
- **Consumer Behaviors (two to three sections).** Choose content that shows real behaviors. Keep the behavior, its trigger, and its consequence together so a reader can follow the cause and effect.
- **Competitors.** Include the maturity model summary and deep-dive analysis on three competitors. Choose content that is concrete and recent. Explicitly call out two “bar-raiser” moves that increase the category standard and two exploitable gaps where the client can win.

B) Bridge to Implications

After each of the three Insight clusters (Market, Consumer, Competitive), add a short implication section of three to five sentences. Each implication section must answer two questions. First, why does this matter to the client now. Second, what must the client do to win in light of this insight. Name one or two KPIs that will be affected so the reader understands the intended outcome.

C) Strategy / Recommendations

Organize the recommendations in two parts: first the Opportunity Zone, and then the Framework with recommendations tied to each framework component.

- **Opportunity Zone**
 - **Opportunity Zone descriptions and rationale.** Write a short paragraph that ties the chosen zone directly back to the Insights and the Implications you just documented.
 - **What success changes.** Write one short paragraph that names the KPIs this zone is intended to move and explains how success will show up in the business.

- **Framework**
 - **Framework name and overview.** Write three to five sentences that describe how the framework works at a high level and why it fits this opportunity.
 - **Components (subsections).** For each framework component, create a small subsection.
 - **What the component enables.** Write two to four sentences that describe the behavior this component will enable or change. Keep the language behavioral and concrete.
 - **Recommendations tied to this component.** Provide one to two compact paragraphs that describe the specific recommendations that belong under this component. For each recommendation, end the paragraph with a parenthetical that names the KPI and the time horizon, such as “(KPI: DAU, CVR • Horizon: 90d)”. Use the time-horizon set of “90 days”, “six to twelve months”, or “twelve to twenty-four months”.

2) Compile into the final long-form narrative (10–15 minutes)

Read the document once from beginning to end to confirm the story flows logically. Add light transitions only, such as “As a result...” or “Therefore...”, to connect sections where needed. Confirm that dates are present on signals and that KPIs are named wherever you prescribe action. Remove duplicate ideas and keep the clearest version of each point. If any statement requires additional validation, leave it marked as “[Assumption]” and do not add new claims.

This completes Step 4.2. The result is a clear, long-form narrative that identifies what is happening, why it matters, and what should be done next, organized in a way that can be converted into slide content in the following step.

Step 4.2 — Narrative-to-Slides Conversion

Purpose

Convert the long-form point-of-view (POV) narrative you created in the prior step into a clear, executive-ready slide format. This is a packaging step only. You are not adding new ideas or conducting new research. You are formatting the story so it can be presented, skimmed, and discussed by senior stakeholders. Slides may be content-rich, and you may produce as many slides as the story requires.

What you will produce

You will produce a set of **slide blocks** that mirror the long-form story. Each slide block must include the following:

- **Title.** Write a benefit-led and specific title that announces the value of the slide, not just its topic.
- **Sub-heading: Executive takeaway.** Write one sentence that a senior leader can read in five seconds to understand the single most important point of the slide.
- **Body content.** Include short paragraphs and/or bullet points. If a table is needed, describe its contents in text for now. If a diagram is needed, describe the structure in text for now. Visual assets will be created later.
- **Sources.** Cite the name of the publisher and the publication date for any statistic or data point.

Owners and RACI

- **Pursuit Lead (Responsible/Accountable)** runs prompt to condense long-form narrative into slide format.
- **Strategy Lead (Consulted)** review and provide feedback on clarity and effectiveness of slide content.
- **Executive Sponsor (Informed or Consulted)** validates win themes when needed.

Inputs

- The **final long-form point-of-view narrative** from the previous step. Copy it in full.
- Any **brand guardrails** you must follow, such as voice and tone rules, words that should not be used, and capitalization preferences.
- The **intended audience**, for example the CMO, CTO, or Director of Marketing, so that tone and emphasis are appropriate. You may take this from the Opportunity Brief if it is not otherwise specified.
- Step 4.2 Prompt

Step Process

1. **Copy the narrative.** Open the long-form point-of-view narrative and copy it in full so the conversion process has the complete context.
2. **Paste and run the prompt.** Use the prompt below exactly once with your narrative and any brand guardrails. The prompt will return a sequence of slide blocks that follow the structure described above.
3. **Review and tighten.** Confirm that each slide contains one main idea, begins with a concise executive takeaway sentence, and includes correct sourcing. If a slide contains two ideas, split it into two slides. Add brief transitional phrases between slides where appropriate so the story flows logically.
4. **Final pass.** Standardize terminology, labels for Key Performance Indicators (KPIs), and time horizons (for example, “90 days,” “six to twelve months,” and “twelve to twenty-four months”). Leave **[Source Needed]** and **[Assumption]** tags in place so they can be resolved during the final review.

Narrative-to-Slides Conversion Prompt

You are an expert executive-communications editor. Convert the long-form point-of-view narrative into a content-rich slide deck script for senior decision makers.

OBJECTIVE

Return slide blocks that are faithful to the narrative’s logic. Do not add new ideas. If evidence is missing, label it [Source Needed]. If a point is based on judgment rather than an established fact, label it [Assumption]. Slides may be content-rich, and there is no limit on the number of slides.

AUDIENCE

[Describe the audience in full words, for example: “Chief Executive Officer and Executive Leadership Team.”]

CONSTRUCTION RULES

- Use plain English and clear, direct sentences.
- Include only one main idea per slide.
- Begin every slide with an "Executive takeaway" sentence that states the single most important point.
- Use short paragraphs and/or bullet points. When slides are dense, add clear sub-headings to organize the content.
- Cite the name of the publisher and the publication date for any statistic or external signal.
- Mirror the client's language and the labels for Key Performance Indicators (KPIs) that appear in the narrative.
- Do not include visuals or creative assets in this step. If a visual would be helpful later, describe it briefly in text.

INPUTS

Long-form point-of-view narrative (paste the full text):

"""

[PASTE THE FULL NARRATIVE HERE]

"""

OUTPUT

Produce a sequence of slide blocks. For each slide, return:

Slide #

Title:

Executive takeaway:

Body content:

- Sub-heading 1
 - Short paragraph(s) and/or bullets

- Sub-heading 2 (optional)

- Short paragraph(s) and/or bullets

Sources: [List publisher and date for any statistics or external signals], or add [Source Needed] / [Assumption] where applicable

Speaker notes (optional, no more than 120 words): [Write a short paragraph that guides how to speak to the slide]

QUALITY CHECKS (apply before returning)

- Each slide contains one main idea and begins with a clear executive takeaway sentence.

- All statistics include a publisher and a date, or are tagged [Source Needed].

- Terminology, labels for Key Performance Indicators (KPIs), and time horizons match the narrative exactly.

- No new claims were introduced. The sequence of slides follows the narrative from beginning to end.

Quick checklist before handoff

- Every slide begins with a clear executive takeaway sentence and contains exactly one main idea.
- All cited data shows both the publisher and the publication date
- The sequence of slides follows the long-form narrative without gaps or reordering.
- Client language and labels for Key Performance Indicators (KPIs) are consistent throughout.

Step 4.3: Case Study Tailoring

Purpose

Recast an existing case study so it speaks in the client's industry vernacular and tone—without changing any facts. This creates a client-native proof point that feels familiar to their audience and mirrors how they measure value (e.g., “average check” vs “transaction value”). The aligned case becomes a drop-in asset for your deck, leave-behind, and RFP responses.

Description

- A fact-preserving rewrite of a prior case study using the target client's language, metric labels, and voice.
- Output maintains the **same facts, numbers, dates, outcomes, partner names, and sequence** as the original.

Owners and RACI

- **Pursuit Lead (Owner)** runs the prompt and generates tailored case study content.
- **Solution Lead (Consulted)** sanity-checks terminology and KPI labeling.
- **Executive Sponsor (Informed)** reviews for tone fit if needed.

Step Process

1. Ingest the essentials

Gather the **full source case study** text.

2. Synthesize a first pass

Run the **prompt below**, and include the **Opportunity Brief** so the rewrite matches the client's vernacular and priorities.

3. Review and refine

Confirm numbers/dates/quotes unchanged, partner/platform names intact, and terminology applied consistently. Resolve any **[VERIFY]** flags with the Solution/Strategy Lead. Smooth grammar where needed **without altering meaning**.

4. Package for use

Produce **Client-Aligned Case Copy** (paste-ready for slides/leave-behind).

What this step is not

- Not a new case study or creative rewrite—**no new claims**.
- Not a results edit—**no changes** to metrics, dates, or outcomes.
- Not a platform substitution exercise—partner names and stacks remain as stated.

Why this matters

- **Credibility:** Mirrors the client's KPIs and vocabulary, reducing cognitive friction.
- **Relevance:** Highlights outcomes the client tracks, increasing perceived fit.
- **Speed:** Creates a drop-in proof point without re-authoring or legal re-approval.

Tools

- **ChatGPT** to perform the controlled rewrite.

Inputs checklist

Collect before you run the prompt (paste excerpts only if needed):

- **Source case study (full text)**
- **Opportunity Brief**
- **Step 4.3 Prompt**

Prompt

You are an editorial adapter. Rewrite the case study so it matches the prospect's industry vernacular and tone—WITHOUT changing any facts.

OBJECTIVE

Produce a clean, prospect-aligned rewrite that preserves all facts (names, dates, metrics, outcomes, platforms, sequence) while adapting terminology and voice to the target audience.

HARD CONSTRAINTS (strict)

- Do NOT add, remove, or alter any facts, numbers, dates, outcomes, partner/platform names, or quotes.
- Preserve metric values, units, and timeframes exactly as written.
- Preserve section structure and event sequence (Overview, Challenge, Solution, Results, etc.).
- Keep overall length within $\pm 10\%$ of the source; no new claims or implied capabilities.
- If a term swap is ambiguous, keep the original and append [VERIFY].
- If a mapped term appears inside a proper noun/product name, do NOT replace it.
- Keep legal/compliance language verbatim.
- (Regulated contexts) Do not introduce clinical/financial/compliance terminology not present in the source; when in doubt, retain the original and add [VERIFY].

CLIENT LENS (use to guide tone & terminology)

- Industry: [e.g., Healthcare provider, FinServ, CPG, Retail, QSR, SaaS]
- Audience: [e.g., Ops & Digital leaders; Clinical access; Category managers]

- Tone: [e.g., precise, plain-spoken, outcome-led; avoid marketing fluff]
- Emphasis: [e.g., speed to value, cost-to-serve, adherence, AOV, sell-through]
- Domain Glossary Hints (optional): [key nouns/verbs/abbreviations the client uses]
- KPI Labels to Mirror (optional): [e.g., average check (AOV), appointment completion rate, OTIF, churn, DAU/MAU]

TERM MAP (apply consistently; left = original, right = prospect term)

- [transaction value] → [average check (AOV)]
- [customer] → [guest / member / patient / consumer] ← choose one
- [basket] → [order / cart / visit / encounter] ← choose one
- [SKU] → [product / menu item] ← choose one
- [store] → [restaurant / clinic / branch / site] ← choose one
- [loyalty card] → [rewards account / member ID]
- [add pairs specific to this prospect]

DO-NOT-CHANGE FACTS (verbatim)

- Brand/partner/platform names
- Dates/timeframes
- Metrics/results/ratings (values & units)
- Quoted statements
- Legal/compliance phrasing

SOURCE CASE STUDY (full text)

"""

[PASTE ORIGINAL CASE STUDY HERE]

"""

OUTPUT

1) Revised Case Study (prospect-aligned tone & terminology)

- Keep headings and structure; rewrite headlines/subheads/body for voice and terms; keep facts unchanged.

2) Substitution Log (table)

Columns: Original Term | Replacement Term | Count | Notes (e.g., skipped in proper noun)

3) [VERIFY] Items

- List any words/phrases you could not confidently adapt without risking meaning or compliance.

STYLE GUARDRAILS

- Plain English, executive-ready. No em dashes.
- Mirror the prospect's KPI labels where only terminology changes are required (values unchanged).
- Smooth grammar after substitutions without changing meaning.
- Maintain capitalization for proper nouns and brand terms.

QUALITY CHECK (perform before returning)

- Numbers/dates/quotes unchanged ✓
- Partner/platform names intact ✓
- Term map applied consistently (counts make sense) ✓
- Ambiguities flagged with [VERIFY] ✓
- Tone reads like the prospect's industry, not generic agency copy ✓

Step 4.4 — Creative Brief & Visual Exploration

Goal

Select 2–3 specific recommendations from Step 3.2 (features, programs, journeys, or UI moments) and translate them into a creative brief + visual direction designers can comp immediately. The visuals should make the recommendation feel real to an executive—clear screens, states, and interactions that show how the idea works and which KPI it moves.

Owners and RACI

- **Pursuit Lead (Owner):** picks the concepts to visualize, authors the brief, ensures KPI/story fit.
- **Experience/Design Lead (Consulted):** validates interaction feasibility and comp scope.
- **Strategy/Solution Leads (Consulted):** confirm viability of the concept in execution.
- **Executive Sponsor (Informed):** aligns tone/ambition.

Inputs

- Step 3.2 outputs (the short list of **specific recommendations** you want to visualize)
- Client Brand Styleguide (if available)
- Step 4.4 Prompt

Outputs

- **Creative Brief (2–4 pages total)** covering **2–3 recommendations**
- **Visual Direction Guide** (references + prompt cues)
- **Comp Spec:** 3–5 comps per recommendation with device/size/state guidance
- **Strategic traceability:** Behavior → Lever → KPI callout per comp

Step process

1) Choose the recommendations — 5 min

Pick **2–3 recommendations** that (a) are visually demonstrable, (b) tie to a primary KPI, and (c) support your pitch narrative (quick win, signature moment, or proof-of-scale).

2) Draft the brief — 15 min

Revise and draft the prompt below to produce the Creative Brief & Visual Direction focused on those 2-3 concepts.

3) Tighten & specify — 7 min

- Add **screen/state lists** for each rec (Default • Personalized • Empty • Edge/Failure).
- Add **KPI annotations** (what on this screen moves which KPI and how).
- Confirm platform feasibility in one line (signals/decisioning/content ops). Remove moodboard fluff.

4) Package — 3 min

Share and review live with the creative lead.

Creative Brief structure

1. Creative Narrative (1 paragraph)

- a. One-line pitch story and the **shift** we're showing (e.g., *friction* → *flow*, *vendor* → *partner*).
- b. Desired emotional arc for the user (confidence, ease, momentum).

2. Design Principles & Visual Tone (3–5 bullets)

- a. Principles (e.g., personalization made visible, elegant utility, anticipatory design).
- b. Tone adjectives (cinematic/minimal/bold/futuristic/human-centered/calm).
- c. Convert each principle into a UI rule (one line).
- d. Recommendations to Visualize (2–3 items) For each recommendation from Step 3.2:
- e. Name & one-liner (what it does, why now)
- f. Primary KPI (e.g., CVR, LTV, CTS, AOV)
- g. Screen moments & channel (e.g., Mobile onboarding: 2-question profile + consent → personalized welcome)
- h. States to comp: Default • Personalized • Empty • Edge/Failure

3. Visual References / Prompt Direction

- a. 2–5 cross-industry analogs (why each fits: pattern/interaction/composition).
- b. Optional Midjourney cues (composition, palette, typography vibe, density, micro-motion).

4. Strategic Connection (per recommendation)

- a. **Behavior** → **Lever** → **KPI** (one line)
- b. Linked **Consumer Theme** and **Competitive Gap**

5. Platform enablement note (signals/decisioning/CDP, CMS, loyalty/CRM)

- a) Accessibility & Brand Guardrails
- b) Min type sizes, contrast, motion-reduction, do's/don'ts for voice/tone.

6. Deliverables Requested from Designers

- a) 1-2 comps per recommendation, including states listed above.
- b) Device/size specs (e.g., iPhone 15 Pro 1290×2796; Web 1440×900).
- c) Optional prototype notes: transitions/micro-motion (1–2 lines), click path.

Prompt

You are a creative strategist preparing a CREATIVE BRIEF & VISUAL DIRECTION for [Brand Name], a [business maturity] company in [Industry/Category], focused on [Use Case] in [Geographic Focus].

CONTEXT

Specific recommendations to visualize (2–3 from Step 3.2):

Concept 1: [paste each with 1–2 lines]

Concept 2: [paste each with 1–2 lines]

Concept 3: [paste each with 1–2 lines]

TASK

Produce a Creative Brief and Visual Direction that will let a designer produce a design comp per recommendation. Make it emotionally resonant, brand-relevant, and easy to prototype.

FORMATTING RULES

- Plain English. Internal document. No em dashes.
- Be specific about screens, states, references, and KPI rationale.
- For every comp, include: Description, Consumer Behavior, Business Outcome and the linked Insight (Consumer Preferences, market research, competitive intelligence); add a one-line platform feasibility note.

STRUCTURE for each Creative Comp

Creative Narrative

One paragraph on the transformation story and why this recommendation matters now.

Design Principles & Visual Tone (3-5)

Principles (1 line each) + a "principle → UI rule" line.

Recommendations to Visualize (2-3)

For each: name & one-liner, primary KPI, screen moments & channel, states (Default/Personalized/Empty/Edge).

Visual References / Prompt Direction

2-5 analogs with reasons; add 3-6 prompt cues if helpful.

Strategic Connection

Per recommendation: Behavior → Lever → KPI, linked Consumer Theme & Competitive Gap, platform enablement (signals/decisioning/CDP, CMS, CRM/Loyalty).

Accessibility & Brand Guardrails

Type/contrast minima, motion-reduction, tone.

Deliverables from Designers

1-2 comps per recommendation, with device/size and states; optional prototype notes.

OUTPUT

A concise brief that a designer can use immediately to create pitch-ready comps that show how each recommendation works and which KPI it moves.

Quality bar

- **Rec-centric:** We visualize **specific recommendations**, not abstract zones.
- **Buildable:** Screens and states are explicit; platform feasibility is noted.
- **Strategically traceable:** Every comp carries a **Behavior → Lever → KPI** line.
- **Pitch-ready:** Clear, differentiated visuals that sell the idea in the room.

Step 5.1 — P-PGUP Assembly

*Manual Process Step

Purpose

In this step you will take the content-only slides and the tailored case studies you already created, and you will **manually reorganize them into a single story that follows the P-PGUP structure**: Perspective → Pain → Gain → Uniqueness → Proof. You are not adding new ideas or research. You are sequencing, labeling, and tightening what already exists so the argument moves from a differentiated worldview to validated outcomes.

What you will produce

1. A deck organized sections, not necessarily using these section headers: **Perspective, Pain, Gain, Uniqueness, and Proof**.
2. A short section-opener slide for each section with a complete sentence executive takeaway.
3. Slides within each section ordered so that each slide advances one idea and serves the purpose of that section.
4. Case study slides in the **Proof** section that present metrics with timeframes and a one-sentence link back to the reframed problem and to the framework component that drove the result.

Inputs

- The content-only slide script you generated in Step 4.2.
- The tailored case studies you in Step 4.3.

Manual Step Process

1) Gather and label your slides

Create five temporary headings in your working document: **Perspective, Pain, Gain, Uniqueness, and Proof**. Read each slide and place it under the heading that best matches the definitions below. Do not edit content yet. You are sorting, not rewriting.

2) Use the P-PGUP definitions to place content correctly

Perspective (Point of View)

This section answers what is happening in their market, how their consumers are behaving, and what their competitors are doing. It explains why those observations matter to them. It also states your unique perspective on the market, the category, or the challenge. In this section you show the client that you understand the landscape differently than others, and you set the stage with authority, insight, and clarity.

- Include insights from market research and explain why those signals matter to the client.
- Include insights on consumer behaviors and explain why those behaviors matter to the client.
- Include highlights from competitive analysis and explain how the client can differentiate or better serve their customers.
- Add one slide that states your unique lens on the problem so the client sees the market through your frame.

Pain

This section reframes the real problem the client faces. You go beyond surface-level symptoms and expose the underlying friction, inefficiency, or risk. You make the cost of inaction clear and personal to their business.

- Start with something the client already recognizes so they feel understood.
- Introduce a blind spot they have not considered and explain its consequences.
- Tie this pain to strategic or financial outcomes so it is measurable.

Gain

This section quantifies the size of the opportunity and the urgency of acting now. You show the financial upside, the operational efficiency, or the competitive edge that is available. You translate abstract ambition into tangible outcomes.

- Quantify business impact such as lost revenue, churn, or delays that accumulate over time.
- Use category benchmarks or peer comparisons when they exist in your materials.
- Frame time as a compounding cost so urgency is visible.

Uniqueness

This section explains why your firm is the only, or the best, partner to deliver the outcome. You highlight differentiators across strategy, execution, platform expertise, or behavioral insight. You draw a clear line between you and the competition.

- Lead with differentiated capability, not with table stakes.
- Show how your model, your process, or your expertise eliminates the risks the client fears most.
- Make the connection between your uniqueness and their business outcomes explicit.

BEST PRACTICES

- Contrast with “what others typically do” and why it fails
- Teach *why your Differentiator is important* —what gap it fills
- Position competitive advantages as **risk reducers**

EXAMPLE

“Most vendors treat personalization as a tech problem. But without a coordinated framework across teams, it fails. Our CAPEs model ensures every experience is rooted in strategic alignment between Commerce, Analytics, Personalization, Experience, and Strategy. It’s not a toolset—it’s an operating model.”

Proof

This section validates your claims with evidence. You use case studies, metrics, outcomes, or references that demonstrate commercial results. You anchor your claims in results rather than rhetoric. You end the section with confidence in both the vision and the ability to deliver.

- Show measurable business results that are tied to your uniqueness rather than generic execution.
- Include anonymized outcomes if client names are restricted.
- Reinforce how your method, not just your tools, produced the success.

3) Trim and order slides within each section

Within each of the five sections, remove duplicate slides and keep the clearest version of any repeated idea. Order the slides from context to conclusion. For example, in the **Perspective** section you should lead with the market signal, follow with the consumer behavior, then highlight the competitive raise-the-bar, and finally state the single perspective that reframes how the client should see the challenge.

4) Add one section-opener slide to each section

Write a complete sentence executive takeaway for the first slide in each section. Use full words and avoid abbreviations.

- Perspective example: “The market is shifting to real-time, consumer-led journeys while competitors raise expectations, which requires the brand to redesign how it creates and delivers relevance.”

- Pain example: “The core issue is not the platform, it is the absence of a continuous behavior system that converts data into timely, personal interactions.”
- Gain example: “Acting now unlocks incremental revenue and reduces cost to serve each quarter, and delay compounds the gap.”
- Uniqueness example: “Our operating model and cross-functional delivery remove execution risks that typically stall personalization at scale.”
- Proof example: “Comparable brands using this approach delivered measurable outcomes within ninety days and sustained lift over twelve months.”

5) Place case studies in the Proof section and connect them back

For each case study slide or page, confirm the following.

- Include a result metric that shows a baseline, a lift, and a timeframe. If the baseline or timeframe is missing, keep the case and add the tag **[Source Needed]** or **[Assumption]**.
- Add one line that explains why this proof matters here, written as “Because we applied [framework component], we changed [behavior] and delivered [metric].”
- Note any relevant platform or “stack parity” if it exists in your inputs, such as “Comparable decisioning and content systems.”
- Include a source and a date for any external statistic.

6) Build the Uniqueness section as two short lists and then tie to outcomes

Create a slide that lists **True Differentiators** and a slide that lists **Competitive Advantages**, one line per item. Follow each item with a brief clause that links to a business outcome or explains the risk it removes. Add a follow-on slide that shows how the differentiators and advantages enable the framework components and move the named Key Performance Indicators.

7) Finish Perspective, Pain, and Gain with complete sentences and sources

In the **Perspective** section, ensure that each statistic has a publisher and a date. In the **Pain** section, end with a sentence that states the measurable consequence of the reframed problem. In the **Gain** section, quantify the upside and the cost of inaction whenever your materials contain the numbers. If a number is missing, leave the claim and tag it **[Source Needed]**.

8) Final checks and polish

Confirm that each slide begins with a complete-sentence executive takeaway and carries a single main idea. Mirror the client's language and their labels for Key Performance Indicators. Leave **[Source Needed]** and **[Assumption]** tags in place for later resolution. Confirm the order is **Perspective, Pain, Gain, Uniqueness, Proof** and that the story flows without gaps.

How Challenger tactics reinforce P-PGUP

- In **Perspective**, lead with an unexpected, insight-driven point of view. This sets the frame and establishes authority.
- In **Pain**, reframe the problem so the buyer sees what they missed.
- In **Gain**, make the cost of inaction feel larger than the cost of action in order to build urgency rather than mere interest.
- In **Uniqueness**, lead the buyer to your solution rather than leading with it so your approach feels inevitable.
- In **Proof**, validate with outcomes, not opinion, in order to reduce risk and build defensibility.

Execution tips

Avoid the “about us” trap. Your deck should not start with who you are; it should start with what the client is missing. Make the story about them by mirroring their language, organizational structure, and Key Performance Indicators. Stay insight-led. Even when you talk about features, lead with what those features enable, such as faster launches, more revenue, or internal wins. End with action. Use the P-PGUP close to set up the next move, such as a workshop, a pilot, or a strategic roadmap session.

“Looks done” checklist

- The deck is clearly organized (not necessarily labeled) into **Perspective, Pain, Gain, Uniqueness, and Proof**, each with a one-sentence opener in complete words.
- Every slide begins with a complete, clear executive takeaway and contains exactly one main idea.
- All statistics include a publisher and a date, or they are tagged **[Source Needed]**.
- The Uniqueness section lists **True Differentiators** and **Competitive Advantages** and links each to business outcomes and framework components.
- Each case study slide in the Proof section presents a metric with a timeframe and a one-sentence link back to the reframed problem and to the related framework component.
- A one-page note lists all remaining **[Source Needed]** and **[Assumption]** tags and what would resolve them.
