

Evaluation Criteria

1. Retailer Compliance Accuracy

- Consistently meets Walmart, Kroger, Amazon, and other retailer-specific rules.
- Zero tolerance for hallucinations; strict adherence to legal and brand guidelines.

2. Search Rank Improvement

- Demonstrated ability to improve discoverability and organic ranking on retailer PDPs.
- Strong keyword optimization strategies.

3. Content Quality & Brand Safety

- Maintains Diageo tone, voice, and brand cues without human rewriting.
- AI guardrails to prevent risky claims.

4. Integration with Stibo MDM

- Reliable API-level integration.
- Maintains Stibo as the single source of truth without disrupting workflows.

5. Azure & OpenAI Sandbox Compliance

- Fully builds within Diageo's Azure environment.
- Utilizes Azure OpenAI with enterprise-grade controls.

6. Bulk SKU Throughput & Scalability

- Enriches thousands of SKUs with consistent quality.
- Stable performance during bulk operations.

7. Cost & Time Efficiency

- Reduces manual copywriting time.
- Minimizes non-compliance rework and associated costs.

8. In-Market Test Readiness

- Deploys MVP capable of producing statistically valid results.
- Tracks metrics such as search rank, traffic, and conversions.

9. User Experience Simplicity

- No prompt engineering required.

- Marketer-friendly, guided workflow.

10. Change Management & Support

- Supports multi-team rollout.
- Provides documentation, training, and governance readiness.
